Full Stack Developer (Web & Mobile)

Location: Karachi, Pakistan (On-site / Hybrid)
Company: Prosper Technologies
Employment Type: Full-time

About the Role

Prosper Technologies is looking for a **Full Stack Developer** to join our engineering team and work on a large-scale enterprise platform focused on inspections, reporting, workflow automation, mobile applications, and system integrations.

You'll collaborate closely with experienced engineers, designers, QA, and product managers to develop and maintain modern web applications, backend services, REST APIs, and a Flutter-based mobile application. This role offers the opportunity to work across the full software development lifecycle while contributing to scalable, high-quality products.

Tech Stack

We're primarily looking for experience with:

- **Backend:** Node.js, NestJS, TypeScript
- **Frontend:** React, Next.js
- **Mobile:** Flutter
- **Database:** PostgreSQL or MySQL
- **Version Control:** Git
- **Cloud & DevOps (Nice to Have):** Docker, GCP, AWS, or Azure

Equivalent technologies are also welcome if you're comfortable learning our stack.

What You'll Do

- Develop and maintain web applications, backend APIs, and Flutter mobile applications
- Design and build scalable REST APIs and business workflows
- Integrate third-party services and external APIs
- Design and optimize database schemas and queries
- Write clean, maintainable, well-tested, and well-documented code
- Prepare and maintain technical documentation, including API documentation, implementation notes, and technical design documentation
- Contribute to technical design discussions and help translate business requirements into scalable technical solutions
- Collaborate with designers, QA, product managers, and senior engineers throughout the development lifecycle

- Troubleshoot issues, improve application performance, and participate in code reviews

Requirements

- 2+ years of professional software development experience
- Strong proficiency in JavaScript/TypeScript
- Experience building backend applications using Node.js and frameworks such as NestJS or Express
- Experience with React, Next.js, or similar frontend frameworks
- Experience developing or maintaining Flutter applications
- Good understanding of REST APIs and relational databases (PostgreSQL/MySQL)
- Familiarity with Git and collaborative development workflows
- Experience creating and maintaining technical documentation, including API documentation, technical designs, implementation notes, or similar engineering documentation
- Strong problem-solving skills, attention to detail, and a willingness to learn

Nice to Have

- Experience with Docker and CI/CD pipelines
- Experience deploying applications to cloud platforms such as GCP, AWS, or Azure
- Knowledge of authentication, authorization, and API security
- Experience with QR code generation, PDF generation, reporting modules, or third-party API integrations

Why Join Prosper Technologies?

- Build modern software that solves real-world problems.
- Work alongside experienced engineers in a collaborative environment.
- Gain exposure to scalable architectures, modern technologies, and best engineering practices.
- Contribute across web, mobile, and backend development while continuously growing your technical skills.
- Opportunity to work on long-term, impactful products with room for career growth.
